Note: all events listed are tentative

TDC– Now a Distributor of Matris USA

With much help from our good friend and fellow member of Kneedraggers 101, Kevin Jones we were introduced to a representative from Matris USA. After a visit to the Track Day Customs shop in January with her partner, she was blown away at the potential Matris USA would have with Mike Alvarez and Track Day Customs. It was decided that Mike, with his current knowledge in motorcycle suspension would be perfect as the Matris USA service provider. Since there are no service centers in the United States, Track Day Customs LLC will become the sole service center, receiving

dampers, shocks, and forks from all over the country to be worked on. Mike will be eventually trekking to Italy to attend the Matris suspension school to learn more specialized information on these one of a kind dampers. Matris components are the more eye catching equivalent to Ohlins, which supplies products for all makes of bikes, Kawasaki, Suzuki, Ya-

hama, Ducati, Aprilia, Triumph, BMW, you name it. This is an extremely exciting opportunity for Mike and Track Day Customs LLC. Mike is very pleased to be working with his favorite aspect of motorcycles– the suspension. If you are interested or would like more information on Matris USA, please visit their website at www.matrisusa.com or come see our Matris display and talk to Mike!

TDC Featured Bike:

2008 Kawasaki ZX-10, professional paint job on Rockwall Performance track fairings, ASV unbreakable levers, Woodcraft rearsets, frame sliders, and clip-ons, custom race exhaust, and upgraded Ohlins steering stabilizer. **For Sale.** Located at the TDC shop– stop by and see it today!
